PROFILE

Senior iOS Engineer and Lead iOS Developer with 7 years of experience building large-scale production iOS apps and mobile SDKs. Strong in Swift, SwiftUI, UIKit, MVVM, modular architecture, Swift Concurrency, testing, CI/CD and release processes. Experienced with banking apps used by millions of users, platform-level SDK work, architecture decisions, code reviews, technical debt reduction, performance profiling and cross-team collaboration.

FIT FOR SENIOR IOS ENGINEER

- Designed modular iOS architecture for a large-scale banking app used by millions of customers.
- Strong hands-on Swift, SwiftUI, UIKit, Foundation, MVVM, modular architecture and modern iOS SDK experience.
- Owned platform-level SDK architecture, public APIs, versioning, backward compatibility, documentation and release flow.
- Improved quality foundations through XCTest, UI testing, code reviews, refactoring and CI/CD automation.
- Strong debugging and performance focus: Xcode Instruments, memory/performance profiling, accessibility and app stability.

CORE SKILLS

Native iOS	Swift, SwiftUI, UIKit, Foundation, iOS SDK, Xcode, Objective-C, Combine, Swift Concurrency
Architecture	Modular architecture, MVVM, TCA, VIPER, Clean Architecture principles, scalable app structures, technical standards, code reviews
Quality	XCTest, UI tests, Quick/Nimble, Appium, Cucumber, test coverage, accessibility, refactoring, technical debt reduction
CI/CD and release	Fastlane, Jenkins, Bitrise, CircleCI, TestFlight, App Store, GitHub, Git, build and deployment scripts
Performance	Xcode Instruments, memory/performance profiling, SDK size optimization, Proxyman, Postman, REST APIs, WebSockets

EXPERIENCE

Lead iOS Developer / Mobile SDK Developer - Equiqo Aug 2025 - Present

- Lead architecture and delivery of a cross-platform mobile SDK, with iOS as primary platform.
- Own public SDK APIs, modular SDK structure, versioning, backward compatibility, release process and technical documentation.
- Define integration guidelines and support client developers through onboarding, troubleshooting and technical planning.
- Build Swift-based SDK features with WebView rendering, JavaScript bridge behavior, analytics event tracking and performance-sensitive mobile embedding.
- Contribute to Android SDK implementation and integration fixes in Kotlin/Java, focusing on API parity and client integration issues.
- Optimize SDK stability, integration flow, runtime behavior and developer experience across iOS, Android, Flutter and React Native.

Senior iOS App Developer - PKO Finat Jan 2024 - Jul 2025

- Designed and implemented modular feature architecture for IKO, PKO Bank Polski mobile banking app used by millions of customers.
- Built UIKit and SwiftUI features with focus on performance, accessibility, reliability and test coverage.
- Wrote XCTest unit/UI tests, performed code reviews, refactored legacy modules and reduced technical debt.
- Collaborated with product, backend, design and stakeholders on requirements, demos and architectural decisions.

iOS App Developer - VMLY&R Apr 2023 - Oct 2023

- Delivered architecture and Swift/SwiftUI/Combine features for United Rentals mobile app.
- Integrated REST APIs and supported CI/CD with Bitrise/Fastlane, TestFlight/App Store flow and product documentation.
- Used Proxyman, Git/Bitbucket, Figma, Jira and Scrum; presented demos and supported stakeholders.

iOS App Developer - SoftServe
Sep 2022 - Mar 2023

- Built SwiftUI/Combine features for REVO booking app with REST and Braintree payment integration.
- Maintained CI/CD scripts with CircleCI/Fastlane and TestFlight release flow; wrote unit tests with Quick/Nimble.
- Handled requirements analysis, estimates, demos, product support and documentation maintenance.

iOS App Developer - Altimetrik Poland
May 2022 - Sep 2022

- Developed React Native features consuming RESTful Java services for an internal skills platform.
- Added Jest, React Testing Library and snapshot tests; worked with Git hooks, Swagger, Postman, Keycloak, Jira and Scrum.

iOS App Developer - Nicman Group
Aug 2019 - May 2022

- Led iOS development for Handbid, a real-time auction and bidding app for iPhone and iPad.
- Migrated Objective-C codebase toward Swift and built REST/WebSocket real-time features for live bidding flows.
- Delivered Apple Pay, Bluetooth onsite registration, unit/UI testing with XCTest/Appium/Cucumber, Jenkins, TestFlight and App Store releases.

EDUCATION AND CERTIFICATION

- Bachelor's degree, Computer Science - Internet and Mobile Technologies, University of Technology Koszalin
- iOS Lead Essentials, Essential Developer Academy
